

Colour

Colour

Colour my life
Choose the rainbow to inspire you and talk to a painter
to make you understand the combinations,
try then to find the most suitable colour for me and pour
at least one drop from each other colour
so I can taste all the feelings.
Colour my eyes so that I can look at things
differently from now on.
Take my heart and colour it as well
so my soul will have the same memories,
and try to use light a lot, it's essential
and, not to forget, if you find the colour for hope and good and love and happiness,
don't hesitate to combine as much.
Colour my life!
so you can see in me the reflection of your dreams of beauty.

Colour my life
colour my heart with the colours of your soul.
Give me light green for joy
and dark blue for hope.
Put some yellow to feel the power of kindness
and red as a call of blood.
Let it be white for ideals
and dark brown for the homeland,
and finally pour this entire symphony into a rainbow and give it to me
as I'll keep it like the most precious gift
'cause it's what you feel and I feel ... the same.
